

IN2Pharma is a consulting company passionate about offering solutions in Medical Affairs, Regulatory Affairs (RA) and Quality Assurance (QA) projects to pharmaceutical and healthcare industry in Benelux. Our offices are located in Kampenhout at the business center “Hof ter Loonst”.

We are looking to expand our team with a **Quality Assurance (QA)** colleague who has the ambition

and potential to grow in our organization. All projects at IN2Pharma are worked on in small teams of 2-5 people and for some projects, you also work on site at the clients' office for (max) 1 or 2 days per week.

Main Areas of Responsibility

Support and advise our pharmaceutical and healthcare clients in setting up, improving and maintaining quality standards in Benelux.

- Switch between various QP/RP projects
- Establish and maintain a quality system: SOP management, change control, training, CAPAs, review batch release documentation in preparation of batch release, coordinate and investigate product quality complaints and non-conformances, perform internal audits and assist in external audits, draft, implement and monitor quality agreements and host health authority inspections.
- Interact with regulatory department, suppliers and contract manufacturing organizations
- Be(come) the trusted advisor for all Quality Assurance related questions/problems
- Share your experience and learn from your amazing colleagues

Technical Skill Requirements

- Level of education: Master degree in life sciences
- Experience in Quality Assurance: GDP and/or GMP
- Willing to deepen in-depth knowledge of the GDP/GMP requirements

Competencies that are an asset

- Strong initiative, pragmatic and problem solver
- Able to cope with multiple projects and changing priorities
- Accurate & efficient: concern for quality, compliance and consistency
- Good communicator & team player
- Experience as RP is an asset
- Experience in Regulatory Affairs and/or as Responsible for Information and Publicity is an asset

Our offer

- A permanent full-time position with a competitive package and supplementary benefits
- Challenging and alternating work environment at an exclusive location
- Personal development opportunities by working closely together on challenging projects in different situations and for multiple pharmaceutical companies
- Integration in a dynamic team with 'happy people', regular team activities and trainings
